"MORGAN" Silver Dollar

**Original US Silver Dollar – over 90 years old
Contains 90% pure US-mined silver**

The Colt .45, the Sheriff's Star – and the gleaming Silver Dollar. These were the ingredients of gun-slinging life in the mining and cattle towns of the Wild West.

Millions were melted down - now even scarcer!

Minted between 1878 and 1921, these "Morgan" Dollars (named after their designer) were struck from 26g of precious 90% pure silver – and that was their downfall. Millions upon millions were melted down by the US government and speculators for silver bullion. And as the remaining Morgan Silver Dollars disappeared, collectors began to hunt them down – making them even more scarce!

• Metal: 900/1000 Silver • Weight: 26.73g

• Diameter: 38.1mm • Mint: Philadelphia

Last ever Sterling Silver Crown of Queen Victoria

This original silver crown is the very last silver coin of Queen Victoria's long reign. Struck between 1895 and 1900 in sterling silver, it is an everlasting commemoration of one of the most glorious monarchs in our history

The silver crown is a very old British tradition – more than 450 years old – and is highly sought-after.
